The Collection of Your Timeless Memory

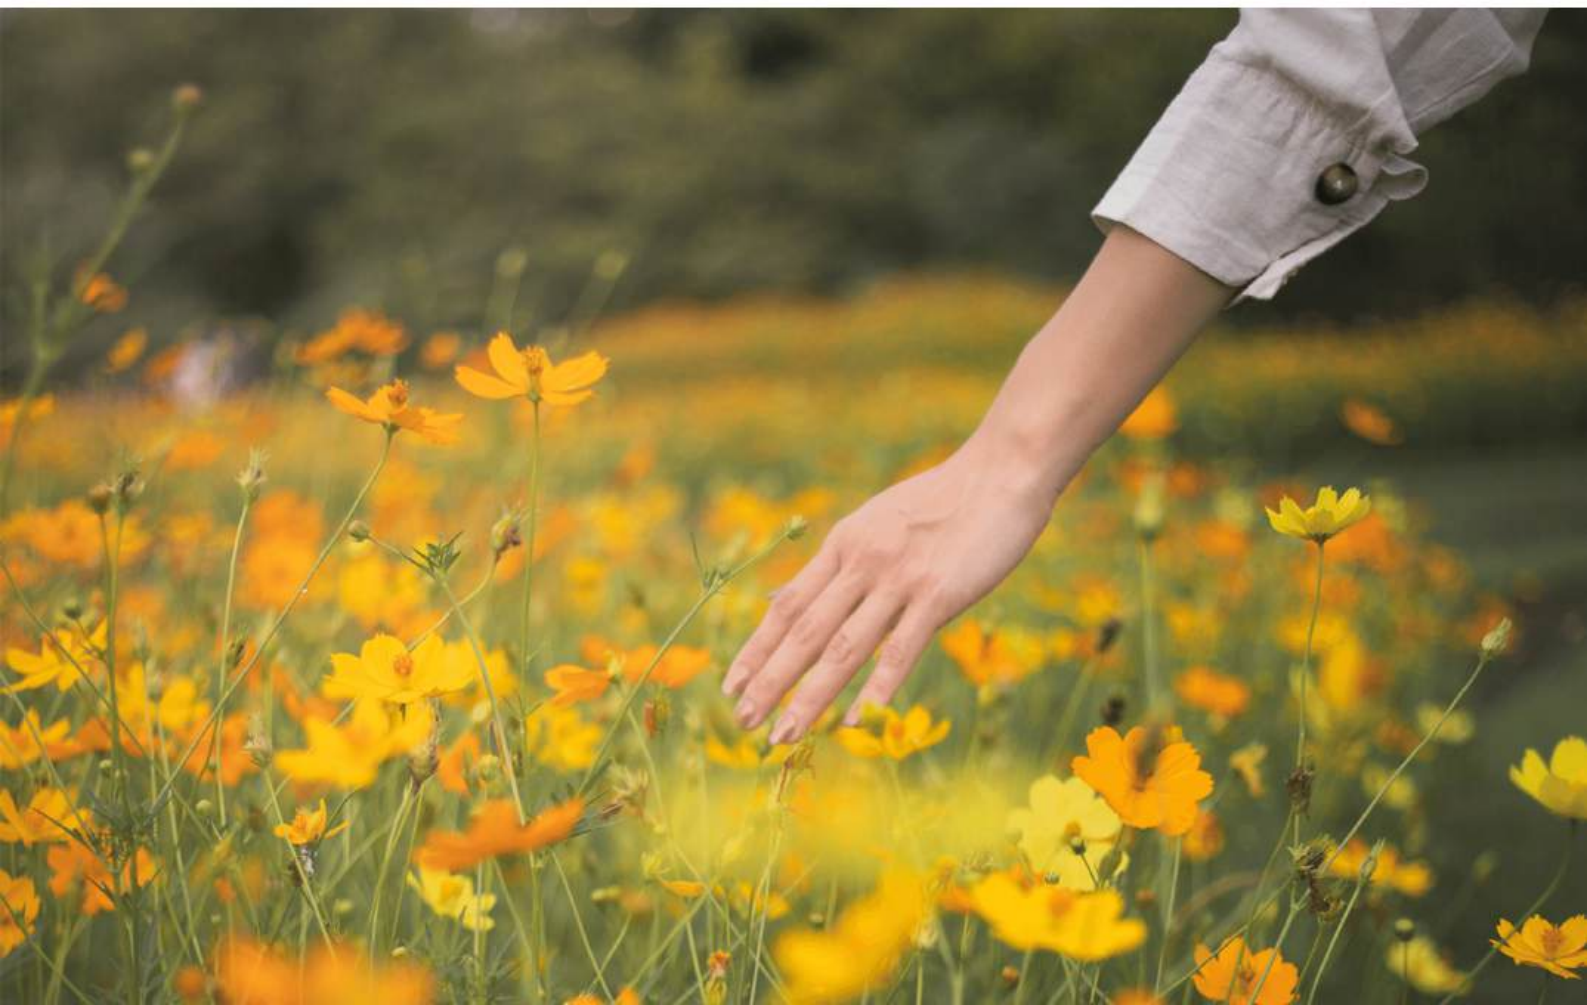

Scent is derived from the Latin sentire, which means "to feel, perceive, or sense."

TYME (/time/) began with the love of scents of three partners who believe that each individual perceives scent differently since it may recall various memories at different times or in different moments.

As a result, we chose the changing nature of the seasons for our debut collection, "A journey through seasons" and carefully captured those scents to our products. Explore the aesthetic of scent and walk through memories together.

A Journey Through Seasons

Walk through your memory with Tyme

Every season unfolds its own unique narrative, painted with distinct scents that evoke vivid memories and emotions. As the year unfolds, these seasonal aromas blend into a rhythm of fragrances, each contributing to the overall narrative of time's passage. Each scent tells a story of change, growth, and the beauty of those nostalgic moment.

Explore the aesthetic of scent and walk through memories together with TYME's first collection

"A journey through seasons."

Dancing in the Rain
